Getting Started with Drive for iOS

Access the Drive Application

After installation, OpenDrive iOS app will be available in your Apps list. Tapping the OpenDrive icon will launch the app.

Log In

The first time you start the app, you will see the login screen. Enter your OpenDrive username and password and touch the Log In button. The app will log in automatically from then on, each time it starts, unless you disable automatic log in.

Sign Up

If you have not yet registered for an OpenDrive account, you can do so through the Sign Up button. Touching the button will change the screen to a signup form that will allow you to enter the information necessary to create a Basic account. To sign up for a premium account that requires payment details, you must do so through the OpenDrive website.

File Browser

Browse Files and Folders

This is the main window of the Drive app, which gives you access to the files and folders stored on your OpenDrive. You can also perform basic file functions, search for files and folders, upload and download files and access your account settings.

The screenshot shows the OpenDrive app interface on an iPod touch. The top status bar displays 'iPod', signal strength, Wi-Fi, and the time '2:37 PM'. The app header includes a 'Back' button, the 'OpenDrive' logo, and a search icon. The main content area lists folders and files: 'Meetings', 'Office', 'dicom-image.dcm' (74.66 KB, Nov 13, 2012), 'Document.doc' (11.00 KB, Sep 12, 2012), 'Penguins.jpg' (759.60 KB, Jul 13, 2009), 'PGantt chart.xls' (9.00 KB, Sep 12, 2012), 'Presentation.ppt' (98.50 KB, Apr 21, 2011), 'T_Kalimba.mp3' (8.02 MB, May 03, 2010), 'Test.txt' (82 Bytes, Sep 12, 2012), and 'Wildlife.mp4' (16.15 MB, Jul 16, 2012). The bottom dock contains three icons: 'Files', 'Upload', and 'Settings'.

Back
Touch this icon to go back to the previous screen.

Files and Folders
Touch a file or folder to open it, or touch the three dots next to a file to bring up a file preview menu that will allow you to share, download or trash the file.

Return to File View
Touching the Files icon will return you to the file browser if you are in another screen.

Search
Touch this icon to search for files or folders that are stored on your OpenDrive account.

Settings
Touch the Settings icon to go to the account settings screen, where you can view account info, log out of the app and modify device security settings.

Upload File
Touch the Upload icon to upload a file to OpenDrive that is saved on your iOS device.

File Preview

Work with Files on OpenDrive

Touching the three dots to the right of a file will open the file preview menu, which allows you to share the file, copy the file link, or send the file to the Trash. You can also download any file to your device by touching the file name or icon.

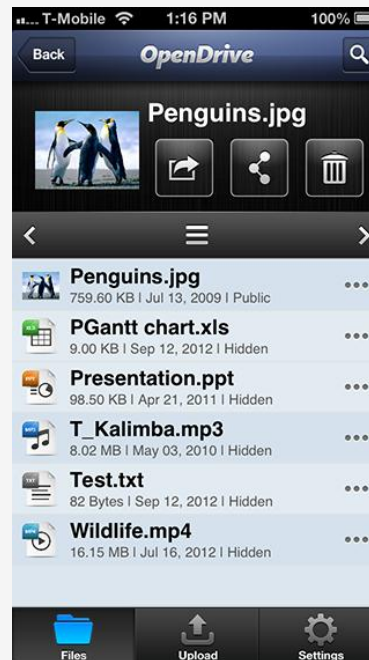

Share

Touch the Share icon to send a message to a friend that contains the URL of the file. Choose the email client and enter the email address of the recipient. Click Send.

Copy Link

Touch the Copy Link icon to copy the share link of the file. You can then paste that link into a text message or email.

Trash

Touch the Trash icon to send the file to the Trash folder.

File Options

More Ways to Work with Files on OpenDrive

Touching the three horizontal lines on the bottom of the file preview will expand the preview menu, which provides more options for working with files and folders on your OpenDrive account.

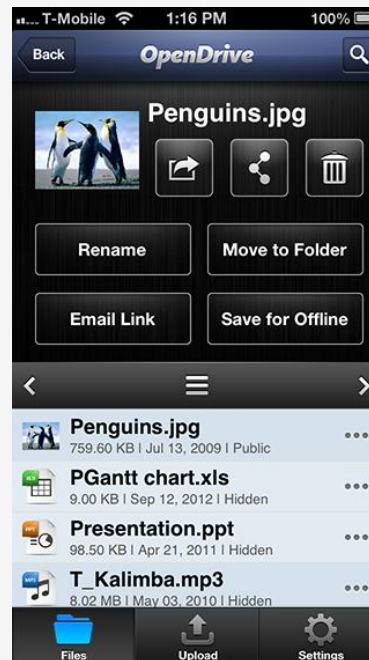

Rename

Touch the Rename button to rename the file you have selected. Once you have renamed the file, click Rename again to confirm. Click the Cancel button at any time to cancel the renaming.

Email Link

Touch the Email Link button to email the file link to a friend using the email client you have installed on your iOS device.

Move to Folder

Touch the Move to Folder button to move the file to another folder on your OpenDrive account. Browse to the folder you want and click the box next to the folder to check it. Click the white Move button that appears to complete the move. Click the Cancel button at any time if you change your mind.

Save for Offline

Touch the Save for Offline button to automatically save a copy of the file to your device's default storage location.

Viewing and Playing Files

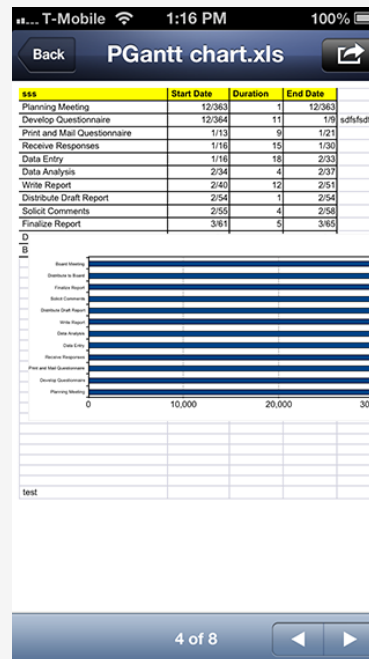

View and Play Files

Viewing documents and pictures and playing music and videos is easy with the OpenDrive iOS app. Simply touch the icon for the file you want to view or play.

View File

View your documents, pictures, spreadsheets, PowerPoint presentations, etc., with one touch.

Play File

Open a music or video file and select the player you wish to use. The file will begin streaming within moments. **NOTE: Download times will vary depending on the connection speed of your cell provider and whether or not you are connected to a Wi-Fi network.**

Settings

Account Settings

The Settings screen contains basic account information and options to delete all offline files, set security options, log out of the app, or tell a friend about OpenDrive.

Account Info

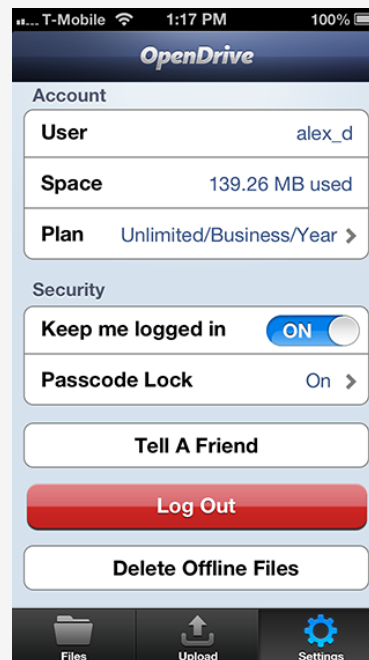

Shows your account username, the space you have on your plan, the type of plan you have and the app version.

Keep Me Logged In

Set to On by default, this feature allows you to choose whether or not you wish to stay logged in when closing the OpenDrive app. Setting this to Off will require you to enter your login info each time you start the app.

Passcode Lock

Enabling this feature allows you to choose a 4-digit security passcode that you will be prompted to enter when starting the app. You can also choose to erase all app data after 10 failed passcode attempts. This protects your data in case your device is stolen.

Tell a Friend

Touch Tell a Friend to send an email or text to someone recommending that they try OpenDrive for the file storage and sharing needs.

Log Out

Touch the red Log Out button to log out of your OpenDrive account. This will return you to the Log In screen, where you can securely close the app so it will not automatically log back in at next startup.

Delete Offline Files

Touch Delete Offline Files to remove all copies of OpenDrive files from your iOS device to free up storage space.
